

Catalytic Thinking:

Catalytic Thinking is a systems-change framework rooted in QUESTIONS that help shift the mindsets that keep us stuck...

- From incrementally reacting to what's wrong, ***to creating what is possible, seeing visionary change as an achievable goal***
- From suspecting the worst in each other ***to bringing out the best in each other***
- From going it alone ***to the power of Collective Enoughness, sharing and building upon each other's strengths***

The result of these shifts is a ***radically inclusive, radically strength-based, and radically visionary*** approach to systems change, aimed at creating a future different from our past.

**The ability to create what is possible is our
SUPER POWER.**

CREATING THE FUTURE
Change the Questions, Change the World!

Questions about PEOPLE

- **Who will be affected by whatever we are considering?**
- **What will it take for THEM to lead the direction we take?**

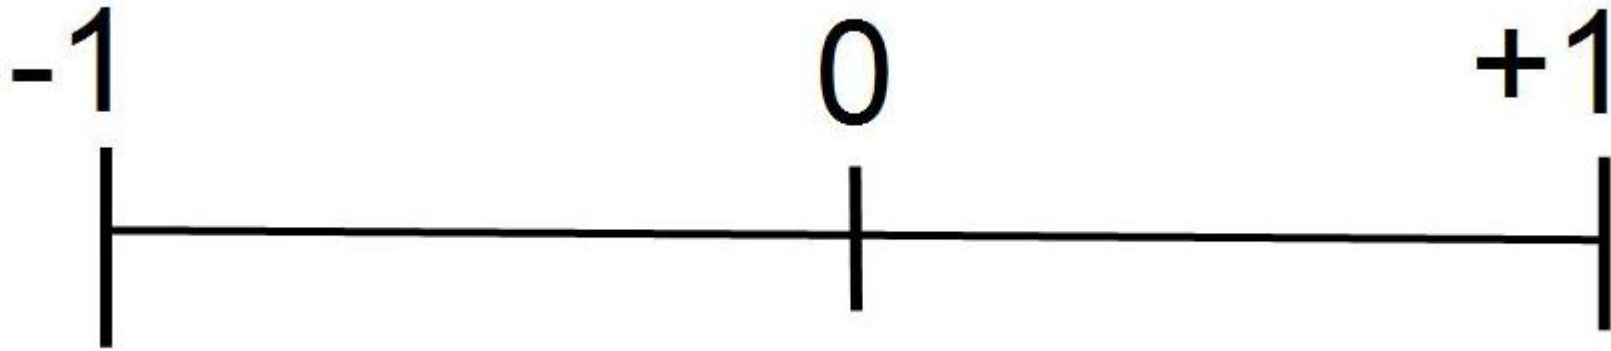

Questions about PURPOSE

- **What do we really want as the ultimate result of our work in the community?**
- **What would GOOD look like in our community?**
- **What will the community look like when we say “Mission Accomplished”?**

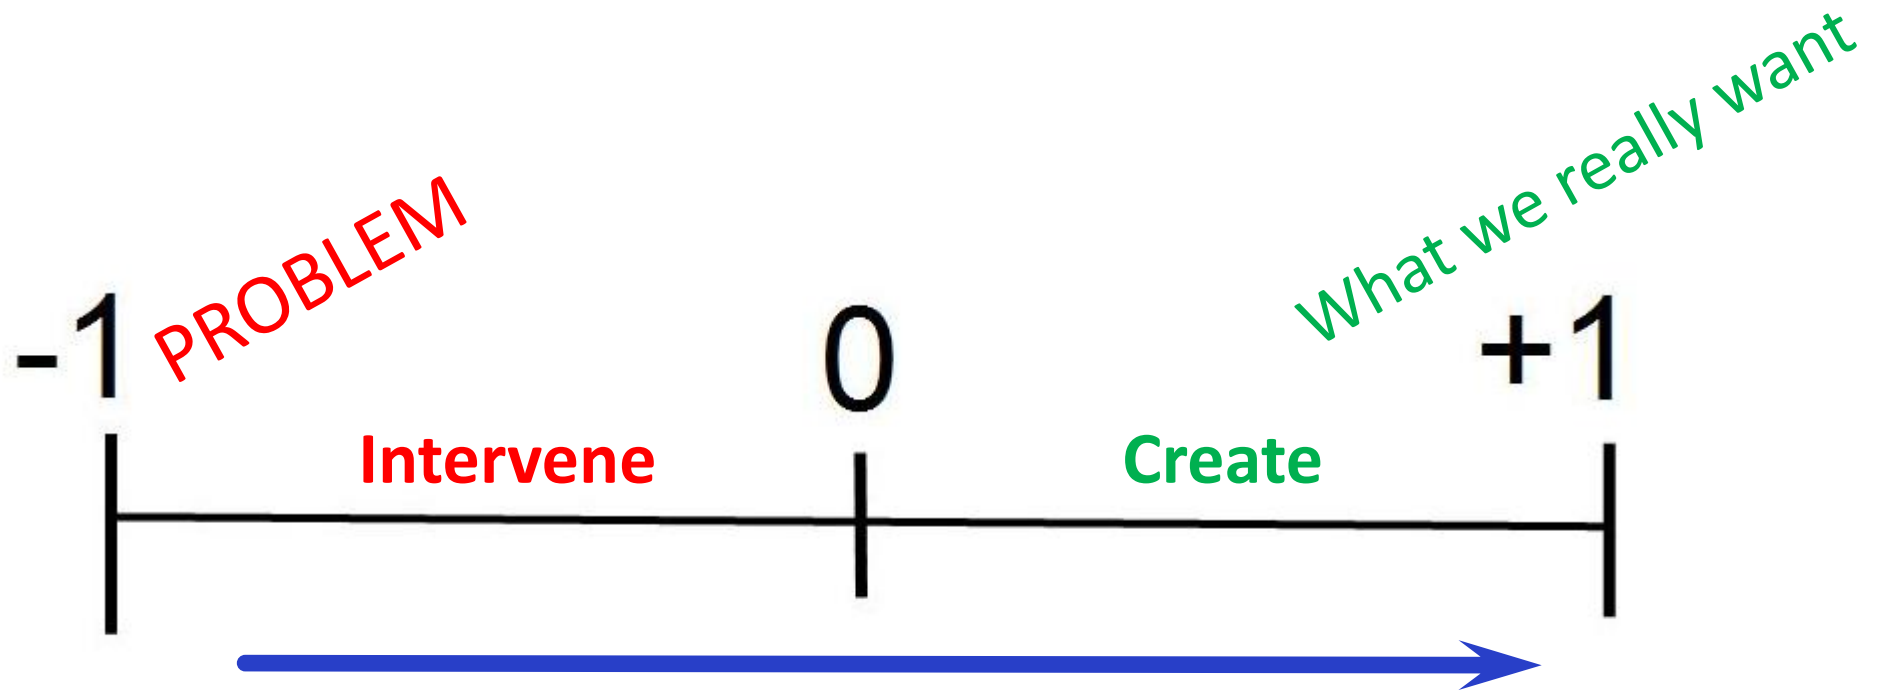

Mindset shift: From what's wrong to what's possible:

It all starts with where we AIM

$$-1 + 1 = 0$$

Solve problems on the way to creating what you really want.

“The greatest danger for most of us is not that our aim is too high and we miss it, but that it is too low and we reach it.”

~ Michelangelo

Less bad \neq Good

CREATING THE FUTURE
Change the Questions, Change the World!

Questions about Resources

Sharing Resources

What do we need?	Who has that / does that?

Collective Enoughness

Together we have everything we need;
it is only on our own that we experience
scarcity.
